

OPERATION **PRAYER ZONE** *Prayer Target*

MARCH 2025

Pray for the Security of America's Energy and Communication Grids

America is facing a potential energy crisis. Our nation's demand for electricity will surge almost 16% over the next five years. The increase of AI in nearly every facet of our lives, seen and unseen, is also putting a strain on our power grids. These grids are simply not equipped to handle this rapid

increase. Our dependency on electricity also makes our power grids a likely security target.

Additionally, the demand on our communication grids continues to increase. The security of our telecommunications and internet is a big concern.

Pray:

- We trust in You, Lord, and in Your unfailing love. We will not be shaken. Though our enemies plot evil against this nation and devise wicked schemes, they cannot succeed. You will make them turn their backs. Be exalted in Your strength, Lord. We will sing and praise Your Name (Psalm 21:7–13).
- Father, we pray for the United States Department of Energy as it oversees development and safety policies. Give the secretary of energy understanding in every aspect of our energy needs and solutions from Heaven to earth to stabilize and protect our power resources and grids.
- Lord, protect our telecommunications and internet from any invasion that would bring harm of any kind to our nation. Set Angelic Warriors on guard to protect these systems.
- As AI increases in every facet of our daily lives, give wisdom and integrity in the regulations that protect our resources and our people. Guard us from AI that interrupts or interferes with how You, the Creator, have designed us to function and have dominion in the earth.
- Lord, we know that You are our source, our strength, and our protector. We will not fear the weaknesses of old systems or the schemes of evildoers. Be exalted in our nation as we trust in You alone.
